

CAMON

C150 Chipper-Shredder

The **CAMON** C150 Chipper-Shredder is an extremely reliable and durable unit, ideal for the professional user looking to clear substantial amounts of garden waste.

The side chute provides access to a heavy-duty chipping blade that will effectively chip branches up to 3½" in diameter.

The larger top hopper is used to feed green waste, such as leaves and conifer etc into the hammer chamber to be shredded into compostable material. The shredding hammers are also capable of handling both wet and dry material and will not be damaged should small stones and nails be fed into them.

The side chipper chute is hinged which makes access and storage much easier and means that the machine is only 37" wide when this is in the transport position.

SPECIFICATION

- 13hp Honda GX390 petrol engine
- 3½" (9cm) chipping capacity
- ¾" (2cm) shredding capacity
- 1 chipping blade
- 36 shredding blades on 3 rods
- 100kg weight
